

e-learning

Online Learning Management System (LMS)

Benefits

- Reduces external training costs.
- Eliminates the need for a trainer to come on site.
- Company can train employees at any time to suit them. Simply a click away.
- New Hires can be trained from day one-no need to wait.
- Easy to provide refresher training.
- In depth reporting facility tracks all users training
- Employee's history of training can be viewed by a click of a button.
- Risk Check list provides essential information to Administrator on any areas of risk within the company along with guidance on how to reduce the risk.

How it Works

- Your company assigns a person to Administer the Learning Management System. (LMS)
- The Administrator is assigned a unique password and username.
- The Administrator determines which employees and which topics will be assigned.
- The LMS contacts students , at Administrator's direction, with subjects and available dates for training to be completed.
- Students passing the course have the option of printing a Certificate of Completion.
- When students complete a course, they receive an e-mail advising them of their results.
- The Administrator has complete access to Risk Assessment Tools, User Management and Student Progress inside our unique, easy to use "Report" function.
